VOLUME 35

NOVEMBER 1992

FROM THE EDITOR'S DESK

A SPECIAL NOTE ON THIS MONTH'S COVER

Our cover picture is borrowed from a Redwood City Almanac press release on our own John Buonocore, KD6ZL, the designated Columbus for Redwood City's reenactment of the 500 year anniversary of his discovery of America. We trust that KD6ZL provided the proper PAARA rendering of this event, guiding his ships in with a hand held on 147.45 (rock bound A.M. of course). N6UE really is a Santa Maria repeater. We understand the Maritime Mobile transceiver was labelled "Marconi Wireless". KD6ZL (we mean Columbus) was seeking a new route to the Ampex Flea Market-Auction when he discovered coffee in the Caribbean and John has capitalized on this by being the PAARA coffee dispenser ever since.

Seriously, congratulations, John!

SPEAKER OF THE MONTH

JIM MAXWELL W6CF

(LATEST FROM JIM VIA PACKET/DXPSN)

TOPIC:

"Everything you always wanted to know about working DX*

But were afraid to ask."

Hints and Kinks and even a few SECRETS about DXing for beginning DXers, with special emphasis on DXing for the novice and technician licensees."

NOVEMBER 6TH !

PRESIDENT'S CORNER DE GERRY WAGLNU

THANKS TO ALL WHO SHOWED UP TO HELP AT THE AMPEX AUCTION. WE MOVED 20 DOZEN DONUTS AND THE COFFEE TO WASH THEM DOWN SO I KNOW A FEW PEOPLE SHOWED UP TO HAVE A GOOD TIME. ACTUALLY WE REGISTERED 267--- DOWN ABOUT 100 FROM PREVIOUS YEARS. UNFORTUNATELY ABOUT HALF OF OUR SELLING TABLES WENT BEGGING. A PHENOMENON FOR WHICH I HAVE NO EXPLANATION. THE PAARA FLEA MARKET TABLE WAS SUCCESSFULLY SOLD OUT, EXPLAINED BY NGFEG & WENIR'S CLAIM THAT NO UNREASONABLE OFFER WOULD BE REFUSED. THE AUCTION MATERIALS WERE OF GOOD QUALITY & WITH A FEW EXCEPTIONS THE BIDDING WAS SPIRITED. WE FINISHED UP ABOUT 11:30 AND SO DID NOT HAVE THE AUDIENCE BURNOUT THAT HAS BEEN A FEATURE OF PAST YEARS. THE TREASURER'S EFFORT LED BY NEPGM INCLUDED AT VARIOUS TIMES WB7TEM & KAGSIQ. WGAPZ BROUGHT THE DONUTS, WITH REFRESHMENT SALES SUPPORTED BY WGLII, WAGHILE, WB6QPV & KGMPN. KAGLZI TOOK CARE OF TABLE SALES & I THINK ENDED UP WITH RUNNING IMPOUND. WAGFHC & NEVZD & OTHERS HELPED MOVE AUCTION HARDWARE. AAGPA PROVIDED SOME VERY NICE RAFFLE PRIZES & KGYT PROVIDED THE USUAL PA SYSTEM. KOERT KCGWCI & JEFF NGWLA WERE MAINSTAYS ON REGISTRATION. NGVFH PROVIDED MUCH NEEDED SIGNS & AUCTION TAGS. I'M SURE THERE ARE A FEW I'VE FORGOTTEN, ESPECIALLY CONTRIBUTORS TO THE SETUP EFFORT, BUT NEEDLESS TO SAY THANKS TO EVERYONE !

NOW I WANT TO TURN TO THE ISSUE OF PAARA ELECTIONS. AS MANY OF YOU KNOW, AFTER SEVERAL YEARS AT THE HELM I INTEND TO TAKE A BREAK NEXT YEAR. THERE ARE MANY PEOPLE IN PAARA WHO ARE MORE THAN CAPABLE WITH REGARD TO BEING OUR PRESIDENT. NEVZD AGREED TO CHAIR A NOMINATING COMMITTEE FOR A SLATE OF OFFICERS. I WILL HELP CHRIS OUT AND APPEAL TO ALL PAARA MEMBERS TO SUPPORT THE NEED FOR OFFICERS & BOARD MEMBERS. I'M A LITTLE BURNED OUT FOR THE MOMENT BUT I KNOW MANY OF YOU WOULD ACTUALLY HAVE FUN IN THE PAARA BUREAUCRACY IF YOU WOULD JUST GIVE IT A TRY. IF YOU GET TAPPED FOR A JOB, PLEASE GIVE IN TO A LITTLE GENTLE ARM TWISTING.

DE WAGLNU

Q S T

PL (subaudible tone access) will be implemented on the 145.23 (-) repeater beginning the first week of December 1992. The PL will be 100 Hz. The Palo Alto 145.23 repeater will continue to be an open repeater, welcoming all hams to share the use of the machine. The purpose of this QST is to provide adequate notice to Bay Area hams that may not now have PL capability on their rigs to acquire that capability before PL access is implemented so that the 523 repeater will still be available to all radio amateurs.

The Palo Alto machine presently *transmits* a 100 Hz subaudible tone to enable hams with tone squelch to listen only to this repeater. This has proved helpful in eliminating cable TV interference and propagation from the Sacramento area.

Most of the new two-meter radios have PL built in. Implementing PL may be just a matter of rereading your users' manual and following the instructions therein. For radios without PL, there are a number of companies who sell miniature PL boards. These are about the size of a postage stamp, so they will fit into most HTs. These can be purchased for less than \$30.

After the first week in December, access to the emergency agencies via the 523 autopatch will require the use of 100 Hz PL tone.

de Rich, W6APZ

Greetings from a former
PAARPA editor! I thought
the attached article might be
appropriate for the next issue.

Hope to see you and the
rest of the gang if I'm ever
out there on a "first Friday."
all the best — Rick
WA6NCX

My Favorite Key

Rick Ferranti WA6NCX Arlington, Massachusetts October 1992

Of the two dozen telegraph keys in my collection, only one assumes a place of honor on my operating desk, placed where its bright polished parts catch my eye every time I sit there. This WWII Navy instrument came from the estate of longtime family friend and PAARA member Elmer Talbert W6PFC, where it was in use at his station from 1946 to just last summer.

It's a key of unusual design, and upon close scrutiny reveals more and more of its unique character. Most striking is its all metal knob, permanently staked to the lever arm. The side bearing supports are attached to the bakelite base by a single screw, but they are prevented from rotating by pins inserted into the base and supports. The captive key spring and adjustment screw are insulated from each other, with a small stepped washer allowing adjustment without binding the spring. An adjacent contact leaf ensures that the key lever is electrically connected to the base wiring. The company that made the key was obviously experienced in bakelite molding, for not only are the rear binding posts made with bakelite insulation and bakelite caps, but the key base is a two-piece bakelite sandwich, which hides all the internal connections. At the left front is a small rectangular port into which a flat piece of metal can be inserted as a keyswitch. Hotstamped on the top right is the designation "CRL 26012."

Yet there's more to this key than its intriguing construction. The CRL identifier was a Navy contractor code indicating that the key was built by Remler Company in San Francisco. Elmer worked at Remler during WWII as a tool and die maker, so he almost certainly made the tooling for this telegraph instrument. And another person still recalls turning out thousands of the knurled monel adjustment screws and locknuts for these keys, produced on an array of Remler's ancient Brown and Sharpe automatic screw machines — that person is my father.

No, the silver-knob Remler key isn't the fanciest or most eye-catching member of my collection, but it's still my favorite. Fifty years ago it was produced through the talents of many people, two of whom remained friends for over five decades. I like to think of this key as a symbol of its owner's expertise, of his warm relationship with my father, and of his many contacts with hams using their own special keys all over the world.
