PAARAgraphs

The Official Newsletter of the

Palo Alto Amateur Radio Association, Inc.**The Friendliest Club Around****Celebrating 89 years as an active amateur radio club—Since 1937**<http://www.paara.org/>

President's Corner

Happy New Year! I hope that everyone has been enjoying the holiday season. Hopefully some of you gave or received a radio related gift this year. And amidst the holiday parties, travel, family visits, and time off, I hope you were able to find time to make a few contacts. The weather hasn't been too friendly the last few weeks, but if you managed to do any holiday POTA activations, bonus points for you!

It was really great to see everyone at the December meeting this year. Turnout seemed very high, and in fact, we had 68 people sign in this year. I thought that was particularly special, but I looked back at the log for the December 2024 meeting, and we had 64 sign ins a year ago! I guess December is just a magical time of the year! I'd especially like to thank everyone who brought and/or helped with the treats and coffee in December, as well as everyone who participated in the Dream to Reality raffle.

*(President — Continued on page 3)*

Upcoming Events

Jan 9 Feb 6	PAARA General Meeting, 7:00 PM to ~9:30PM Zoom and In Person Meeting.
Jan 21 Feb 18	Board Meeting, 7:00 PM. Everyone welcome! Zoom Meeting, eMail President for details.

A 30-Year Late QSO Chris Maughan, G7LQX

Chris Maughan studied Electronics at university, but quickly moved over to software and has worked at NVIDIA for 26 years, developing software debugging and analysis tools for game developers. These days, now that his children have gone off into the world, he uses the extra space and time to indulge his inner maker, focusing on electronics, radio, and computer projects.

This meeting will be a Hybrid Meeting Zoom and In Person

Time: Jan 9, 2026 07:00 PM Pacific Time
Please check <https://www.paara.org> for
Zoom Details

Question
of the
MONTH

You are operating on 40m SSB, and you adjust your VFO to 7300.01;
are you legal to transmit?

You are operating on 20m SSB, and you adjust your VFO to 14347.01;
are you legal to transmit?

Power Supply Testing Procedures

By: Gary Barnes, KI6HIG

I have some test equipment to check the operation of my ham radios. I have a radio frequency signal generator, a frequency counter and a radio frequency power meter with power attenuators up to 250 watts. I did not have a good way to check the power supply operation.

The first way I had to check the power supply operation was to use fixed resistors as load on the power supply. I used 5, 200-watt resistors in parallel as a load. This was a 23 Amperes load. This will only check the static operation of the power supply and not the dynamic operation. In CW mode of the radio, with the key up, the radio will be in receive mode with a load current of about 2 Amperes. With the key down, the radio will be in the transmit mode and the load current for a 100-watt radio will be over 20 Amperes.

My ACDC model EL750B power supply tester, has three test frequencies of operation, DC, 120 Hertz and 1000 Hertz. The instrument panel marking has the 1000 Hertz frequency listed, but the actual frequency is 960 Hertz or 16 times the line frequency. When using an oscilloscope to measure the rise time, the oscilloscope trigger is set to LINE.

A dynamic load tester is able to change the test current between different levels of current. I wanted an analog power supply that would use single-phase line power. Power supplies that operate with over a 100 Amperes need three-phase power. I found a 120 Amperes, 20 volts power supply that would operate on 120 volts line power made by Hewlett Packard. This is the power supply that I used for my testing of the EL750B. The maximum output power is 1660 watts. As you increase the output voltage, the maximum output current will decrease. I also have a 60-volt, 1-Ampere power

supply.

I found someone on the Internet who said they could fix my load tester, but they may have to use used parts to repair it. I was OK with using used parts as new parts are not available. About three weeks later, they called me to say they had repaired my instrument. I asked if was calibrated, and they said yes. Then, I asked if they had data and they said no. How can you calibrate an instrument if you do not know the test points or the accuracy? They said it would require about 3 weeks to make a data worksheet. I made a data worksheet with the test specifications and accuracy ratios for all test points. It took me about two hours to complete the Excel data workbook. I used the calibration procedure in the manual. The first data workbook was 3 pages long, and last version is 4 pages long. I left out the insulation check between the bus bars and the power leads.

When I received the instrument after calibration, it had only one data page. This was the first page of the calibration data worksheet I had made. This was for the accuracy of the DC voltmeter and the DC ammeter. The voltmeter was checked up to 60 volts. The input voltage limit is 55 volts, but the voltmeter has a range of 60 volts. Tests of all of other functions of the power supply tester were not performed.

I called the repair company, and then I returned the instrument. After several weeks they returned the instrument to me. They had included more data, but not

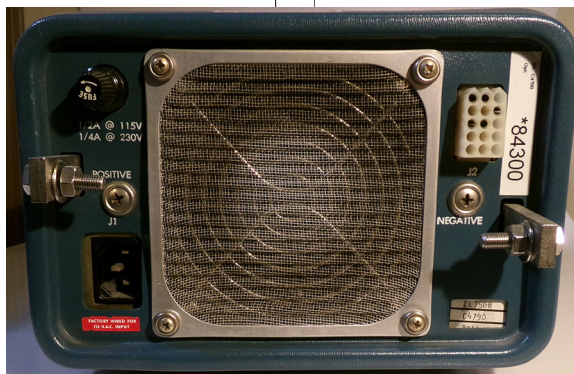

all of the data. I returned the instrument again. This time I found a problem; there was a short between the input power and the bus bars. I returned the instrument again. They said the problem was a wrong screw installed.

I do not own a HiPot (high potential) instrument. Therefore, I would not be able to check

(Power Supply — Continued on page 3)

EL750B Front Panel

EL750B Rear Panel

(Power Supply — Continued from page 2)

their work. A HiPot tester checks leakage current at high voltage. The model EL750B uses a test voltage of 1000 volts AC and 500 volts AC. This is a pass/fail check. The HiPotter can be using either AC voltage or DC voltage. The current limit is less than 5 milliamperes. If the instrument under test passes, then a green light is turned on or a red light will indicate failure.

Other instruments that can be used to check insulation resistance. One company is Biddle and the model is called Megger. This was an American company, but now it is made in England. Fluke is another company.

The last time I received the power supply tester it worked and was in tolerance. I did notice one thing; every time I received the instrument, it had a different serial number.

Official results of the December 5, 2025 election for the Palo Alto Amateur Radio Association (PAARA) board.

Position	Candidate	Votes
President	Bob Ridenour	36
Vice President	Rob Fenn	36
Secretary	Ric Hulett	35
Treasurer	Margaret Cooper	36
Director (2 year)	Sorin Constantinsecu	35
Director (1 year)	Doug Teter	36
Director (1 year)	Darryl Presley	35

Total of 36 votes cast

Clark Martin

Election Commissioner

(President — Continued from page 1)

I'd also like to thank the officers and directors who were reelected at the December meeting. It's great to have such an active board, the members of which each contribute their unique time and talents to help run the club. The PAARA Board of Directors for 2026 consists of: Bob KN6YGN (President), Rob KC6TYD (Vice President), Ric N6AJS (Secretary), Margaret K6WEK (Treasurer), Walt K6WGY (Director), Sorin KN6YUH (Director), Doug KG6LWE (Director), and Darryl KI6LDM (Director).

As we turn to the new year, do you have any ham radio resolutions this year? You may have heard that some of us have decided to learn enough

CW to make at least one contact each during this year's Field Day. Maybe that can be your resolution as well. Or maybe you've got an antenna that you haven't managed to get assembled yet. Or you've been hearing about members' weekend POTA/SOTA activities and haven't quite managed to join the fun yet. Maybe your resolution is to make it to the Wednesday ham radio luncheon at the Black Bear Diner (that's one of mine for this year), or maybe it is simply to be able to make it to the meeting after the meeting for some pizza and conversation. Or maybe your resolution is to find the time to finish your project that you'd like to bring to Home Brew night at the March meeting. Regardless of what your resolution is, I'm sure you'll find lots of friendly PAARA members willing to help and provide support and encouragement!

Lastly, if you've checked out the ARRL web site recently, you may have seen that ARRL is recognizing 2026 as "The Year of the Club". They are supporting various activities throughout the year including innovative programs to support club growth and bolster club activities, opportunities to celebrate and recognize clubs on the air, recognition and incentives for clubs that help increase ARRL membership, and recognition for clubs celebrating significant milestones, including 100 years of ARRL affiliation, and much more. There is a club newsletter contest, a club website contest, and QST will feature club photos in every 2026 issue. I encourage you to visit <https://clubs.arrl.org/year-of-the-club> to learn more. We'll be watching for opportunities to participate in these activities throughout the year – PAARA in the Park in April would be a great opportunity to take a club photo to submit to QST, so I'd encourage you to join us if you can!

I hope to see you all at the club meeting on January 9th, either IRL or on Zoom! If you're there in person, please join us after the meeting for pizza. Just a reminder that we've moved to the Round Table Pizza at 702 Colorado Ave in Palo Alto – just a short drive north on Middlefield Road from Cubberly Community Center where the meeting is located. If you're not sure where it is or need a ride to get there, please ask at the meeting. We'd love for you to join us!

Happy New Year! It's going to be a fun and exciting year at PAARA!

73, Bob KN6YGN

Get on the air to keep the airwaves alive!

Dec 2025 PAARA Board Meeting Minutes

In attendance were President Bob Ridenour KN6YGN, Vice President Rob Fenn KC6TYD, Secretary Ric Hulett N6AJS, Treasurer Margaret Cooper K6WEK, Directors Sorin Constantinescu KN6YUH, Walt Gyger K6WGY, Darryl Presley-KI6LDM, and Doug Teter KG6LWE. Also attending was Connie Stillinger W6EFI.

The meeting was called to order at 7:04 pm.

MEETING NOTE:

Due to the New Year Holiday, the January 2026 meeting will be held on January 9.

Officer Reports

- President's Report (Bob):
 - We gratefully acknowledge contributions from several members in honor of Frank Fox, AF0XX.
 - I have downloaded Field Day 2025 results from ARRL; I will present these at the January meeting.
 - I am in contact with the manager at Round Table on Colorado Ave. in Palo Alto. If we let them know we are coming after the meetings, they can be staffed appropriately. Will review the website for online ordering.
 - The recurring Zoom meeting for monthly club meetings has ended. We will re-schedule for 2026, and will check to see if we can automatically mute incoming audio from Zoom for all participants.
- Secretary's Report (Ric):
 - Members, note: PAARA membership expires on December 31. If you have not renewed yet, this would be a great time to send a check, or use Zelle (preferred) or PayPal from our website.
 - Renewals have been coming steadily: There are still 91 members who have not renewed for 2026.
 - Need to process renewals for two club callsigns by January. (W6ARA license expires 1/10/26).
 - I will visit the print shop to discuss the 'postage due' problem with PAARAgaphs.
- Treasurer's Report (Margaret):

- Raffle report to the State: The form is completed, and will be submitted after the end of the year.
- We reviewed the overall income and expenses for 2025 to date.
- The next reports due are the Federal tax return, and State Charitable Organization registration.
- VP / Program Chair Report (Rob):
 - Our January speaker will be remote from the UK: Chris Maughan, G7LQX, will describe his homebrew radio sets.

Standing Items

- In case you may have forgotten, we need your ham radio article for our fine newsletter. You know that you have a story, historical, amusing or fantastic. Please write it up, even briefly, and send to KN6YGN, your editor.
 - This month we have an article on power supply testing from Gary Barnes KI6HIG.
 - Review ad layout.

We'll review the advertising layout for this month's PAARAgaphs.
- Education Committee [Darryl]
 - January's Question of the Month is about frequency limits for SSB operation.
 - Spring PAARA in the Park:
 - ◆ PAARA in the Park will be at Cupertino Memorial Park on April 18, 2026.
 - ◆ Activity: TBD, we are considering a Code Practice Oscillator, or possibly a foxhunt.
- IT Subcommittee Updates [Sorin]
 - The latest member to join the club has been auto-published into the club roster, so the system appears to be working as expected!
 - Sponsors page: We should clean up PAARAgaphs and update the website
- Bookkeeping Subcommittee Updates [Margaret]
 - The books in GnuCash are up to date except for some legacy assets.
 - PAARAgaphs Advertising: We are in need of an advertising coordinator: This is

(Minutes — Continued on page 5)

(Minutes — Continued from page 4)

a fairly low time commitment, and we need a member to volunteer for this job. Walt K6WGY will provide information and assistance to the new owner.

- o Walt proposed that we raise pricing for ads on our website. We did not reach a decision.
- o Invoice status: Invoices for PAARAgaphs advertising should go out in January.

Old Business

- Club Computers:
 - o We have decided to sell the old laptops to club members for \$50.00 each, as is, and will publish the specifications in a newsletter ad.

New Business

- We reviewed the preparations for an annual report(s) to the membership. This will be presented in the January meeting.
- N6NFI Repeater needs some maintenance/repairs
Rolf, N6NFI, has mentioned some required maintenance of the 'NFI repeater. Darryl and Doug agreed to evaluate the work needed, and report back to the board to determine if we are able to assist.
- Proposed repairs and maintenance of the tower trailer: Gary KI6HIG suggested some maintenance items for the club's tower trailer. We will evaluate this soon.
- We had a discussion about the monthly raffle. We observe that the cost of the raffle is fully covered by donations, other club income, and ticket sales.
- We discussed ways to reduce the cost of the Field Day t-shirts.
- We discussed an outline of club accomplishments and stats for 2025. Bob will manage the overall presentation, with input from the Secretary and Treasurer. We will present at the January meeting.

The meeting was adjourned at 9:18 pm

Respectfully submitted

Ric Hulett N6AJS

PAARA Secretary

Barista Opportunity

The club needs your help with setting up the coffee urns before the meeting starts, and with taking them down when the meeting is over. Simple and clear instructions will be available, as well as coaching as needed. If you can also store the two boxes between meetings and wash the baskets from the urns between meetings (particularly before a meeting where you can help with setup) that would be of great help, although it's not strictly necessary. Please add your name to the coffee rotation sign-up sheet which will be posted above the coffee urns, or get in touch with Sorin KN6YUH. Your help is greatly appreciated!

HF Rig Loaner Program

The Palo Alto Amateur Radio Association (PAARA) offers an HF rig loaner program to help new General Class amateur radio operators get active on the HF bands. The program has two club-owned radios available for loan: a Yaesu FT-920 and an Icom IC-7300. The loan period is for six months, with the possibility of an extension if no one else is waiting to borrow a radio.

The loaner package includes the radio, a power supply, and a microphone. However, the borrower is responsible for providing their own antenna, tuner, and feedline. Any PAARA club member who is interested in borrowing a radio can get in touch with the program coordinators, Doug (KG6LWE) or Ric (N6AJS), by emailing radioloan@paara.org. For pictures and more, please check <https://paara.org/loan.html>.

Discord Server

Do you want to talk to other PAARA members and friends about Homebrew, POTA, SOTA, digital modes, or any other ham radio topic? Download the App or use the Web version, then join our server by scanning the QR code, or visiting <https://discord.gg/qPyn5h8p6H>.

For any issues, please reach out to Sorin (KN6YUH) or Connie (W6EFI).

December Raffle Winners (left to right):
 Allen (KN6UZU), John (KO6BVO), Kieth (K1OKS), Connie (W6EFI),
 Bob (KN6YGN), Gabriel (AJ6X), Brian (AC6MM)

PAARAgaphs accepts paid advertisements from non-members. (short personal ads remain free for members in good standing). **All ad rates listed are per issue.**

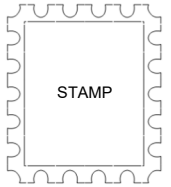

- Not-for-profit ads by association members for ham-related items and wants. No cost for business card-size ads (additional space at \$2.50 per business card size per issue).
- For Profit organizations and/or individuals: \$5-business card size, \$14.00-quarter page, \$25-half page, \$50 full page or back cover per issue.

These fees may be reduced or waived in exchange for a valuable consideration that is given to the Association or its general membership. Such consideration must be in addition to any existing arrangements with the association. The PAARAgaphs editors reserve the right to reject any ad deemed to be not in the best interest of the Association.

All fees payable in advance by the year with "scanner-ready" copy or text-only ads. **Give payment and copy to Walt Gyger, K6WGY.**

FTDX101MP | 200W HF/50MHz Transceiver

- Hybrid SDR Configuration • Unparalleled 70 dB Max Attenuation VC-Tune • New Generation Scope Display, 30SS • 40/100kHz Band Indication • MPD (Multi-Purpose) VFO Driver Duo • PC Remote Control Software to Expand the Operating Range • Includes External Power With Matching Front Spacer

FTDX10 | HF/50MHz 100 W SDR Transceiver

- Narrow Band and Direct Sampling SDR • Down Conversion, 9MHz IF Roofing Filters Produce Excellent Shape Factor • 5" Full-Color Touch Panel w/3D Spectrum Stream • High Speed Auto Antenna Tuner • Microphone Amplifier w/2-Stage Parametric Equalizer • Remote Operation w/Optional LAN Unit (SD-LAN10)

FT-991A | HF/VHF/UHF All Mode Transceiver

- Real-time Spectrum Scope with Automatic Scope Control • Multi-color waterfall display • State of the art 32-bit Digital Signal Processing System • 3kHz Roofing Filter for enhanced performance • 3.5 inch Full Color TFT USB Capable • Internal Automatic Antenna Tuner • High Accuracy TCXO

FTDX101D | HF + 6M Transceiver

- Narrow Band SDR & Direct Sampling SDR • Crystal Roofing Filters Phenomenal Multi-Signal Receiving Characteristics • Unparalleled -70dB Maximum Attenuation VC-Tune • 15 Separate (HAM 10 + 6M S) Powerful Band Pass Filters • New Generation Scope Displays 3-Dimensional Spectrum Stream

FT-710 Aess | HF/50MHz 100W SDR Transceiver

- Unmatched SDR Receiving Performance • Band Pass Filters Dedicated for the Amateur Bands • High Res 4.3-inch TFT Color Touch Display • AES3 Acoustic Enhanced Speaker System with SP-40 For High-Fidelity Audio • Built-in High Speed Auto Antenna Tuner

FT-891 | HF-50 MHz All Mode Mobile Transceiver

- Stable 100 Watt Output • 32 dB IF DSP • Large Dot Matrix LCD Display with Quick Spectrum Scope • USB Port Allows Connection to a PC with a Simple Cable • CAT Control, PTT RTTY Control

FT-3185RASP | Heavy-Duty 85W 2M FM Transceiver

- Massive HeatSink Ensures Reliable 85W RF Power • Super-DX Function Increases Receiver Sensitivity & Weak Signal Reception • 221 Memory Channels • Large 5-Character Alpha-Numeric Display

FTM-150RASP | 2M/430MHz FM True Dual Band Xciv

- Dual Receivers (V-U, U-U, U-V, U-V) Operator • 55W VHF & 50W UHF • Heavy Duty Real Sink w/Universal RF Connection Conductor • Front & Rear Body Speaker for 6W High Quality Audio

FTM-510DRASP C&FM/FM 144/430MHz Dual Band Xciv

- New Super-DX & ACP Inductive Digital Signal Processor Unit • True Dual Band Receiver (V-U, U-U, U-V, U-V) C&FM C&FM Digital D-D Dual Receiver • 2.4" High-Res Full-Color Touch-Panel Display • Wireless Operation Capability with Optional Bluetooth® Headset

FT-60R | VHF/UHF Rugged Dual Band

- Over 1000 Memory Channels • Wide Bank Receiver Coverage • High Power Output 5 Watts • High LCD Display • NOAA Severe Weather Alert with Alert Scan

FT-70DR C&FM/FM 144/430MHz Xciv

- System Fusion Compatible • Large Front Speaker delivers 700 mW of Loud Audio Output • Automatic Mode Select: detects C&FM or FM Audio and Switches Accordingly • High 1,105 Channel Memory Capacity • External DC Jack for DC Supply and Battery Charging

FT-5DR C&FM/FM 144/430 MHz Dual Band

- High-Res Full-Color Touch Screen TFT LCD Display • Easy Hands-Free Operation w/Built-in Bluetooth® Unit • Built-in High Precision GPS Antenna • 1200/800bps AFSK Data Communications • Supports Simultaneous C&FM Digital • Micro SD Card Slot

FT-65R | 144/430 MHz Transceiver

- Compact Commercial Grade Rugged Design • Large Front Speaker Delivers 1W of Powerful Clear Audio • 5 Watts of Portable RF Power With-in a compact Body • 3.5-Hour Rapid Charge Included • Large White LED Flashlight, Alarm and Quick Home Channel Access

VX-6R | VHF/UHF Dual Band Hand-Held

- Big-Radio Features in a Compact Package • Wide-band Receiver Coverage for Catching All the Action • 900-Channel 24-Bank Memory System • Outdoor-Ready Features including Waterproof Rating • Smart Screen Automatic 51-Channel Scanning/Locking System
